

Small provider SEBA

Blackfoot[®]
Connect to more.

Why we care

- Committed to best practices for data networks for 17 years
 - As opposed to Telco networks
- Efficient use of capital
- Avoid entrapment
- Sliding 10 year strategic technology plans
 - Map depreciation cycles
 - Vendor EOL
 - Plan for skills development
 - Consider structural changes

What are we doing

- SEBA test environment complete by Q1 2020
 - Complete model of service delivery environment using all open source and commodity elements
 - All services run on commodity servers
 - Includes in building (res and bus) networks
 - Later in 2020 will include automated functions driven through portals
- Alongside legacy test network

How we will use it

- Plan for introduction of SEBA components to our live network
 - Understand integration requirements to our legacy environment
 - Training environment
 - First live deployment of select elements in 2021
- Use learnings to understand possible functional changes
- Invite other small providers, agencies to visit, evangelize
- Demonstrate our responsible use of federal funding
